

Roy Cuenca

FRONTEND & MOBILE DEVELOPER

INTRODUCTION

Hello friends, my name is Roy, and I am a Frontend & Mobile Developer. I have completed various Master courses in JavaScript, focusing on a range of development skills. These courses include ReactJS, Hooks, Context API, Next.js, React Native, GraphQL, Apollo Client, Node.js, Express, Strapi, MongoDB, and SQL.

EXPERIENCE :

I have more than 6 years of experience as a web designer, Frontend & mobile & javascript developer. I've participated in different projects in which I have had a very good performance with my skills and my group communication.

I am a self-taught young man whose daily discipline is to study and learn from all the opportunities that arise. Currently, I am still a student at the UdeMy Academy as well as in different study portals, with the idea of raising my skills every day.

I have successfully completed more than eleven professional web applications and three high-level Mobile applications. As well as a BBF application work with nodejs using Express.

Regarding teamwork, my vision is to always create a harmonious environment among my colleagues, managing effective communication.

Another of my strengths is always working in a group, trying to input ideas and add to the culture and way of working of each company, and never stop study.

EXO/FullStack Developer
(2023 - currently)

Knit: Is a mobile app developed using React Native and Nest.js. It serves as a simple file management and file sharing application, similar to LastPass or Google Drive, but with a more user-friendly interface. The app is seamlessly integrated with Keycloak for authentication services. This application also features an integrated subscription system using the Stripe payment platform for user storage management.

Additionally, it includes bug report integration with the Jira dashboard for efficient issue tracking and resolution.
